SUMMARY: Python Software Engineer with 9 years of experience in IT, transitioning from a deep background in SDET to backend and full-stack development. Proven ability to build and maintain scalable systems using Python, FastAPI, and AWS. My QA foundation ensures I deliver robust, well-tested code. Recently, I migrated a core service to an async stack with SQLAlchemy 2.0 and owned features end-to-end on an AWS ECS-based platform.

SKILLS Python | Django | FastAPI | asyncio | Chalice | JS | TS | AWS | SQL | PostgreSQL | MongoDB | Docker | pytest | CI/CD | Jenkins | Git | Bash | HTML | CSS | GraphQL

PROFESSIONAL EXPERIENCE

Renzo, Inox living

Sofia, Bulgaria

Python Backend Engineer (Feb 2026 - July 2026)

Working on Inox, a SaaS platform for property development management. Develop and maintain Python/FastAPI services as part of a microservices-to-monolith migration (SQLAlchemy 2.0 async, Pydantic v2, PostgreSQL). Build REST APIs, fix production bugs, and own features end-to-end from ticket to deployment on AWS (ECS, CodePipeline). Write integration and end-to-end test suites (pytest, Playwright)

Nuovo Photography

Sofia, Bulgaria

Python Full-Stack Engineer (Jan 2026 - Feb 2026)

Worked on building and enhancing full-stack functionality, from backend services (AWS, chalice) to user-facing features within React. Participated in developing API, requirements decisions and feature delivery. The cooperation ended early as the project priorities shifted.

RingCentral Bulgaria

Sofia, Bulgaria

Python SDET (Apr 2024 — Jan 2026)

As SDET with Python stack I : I write and maintain automated tests in Python using our custom test framework, which I also help to develop and maintain. Develop and fine-tune test scenarios to ensure comprehensive coverage of all requirements. Integrate automated tests into our CI/CD pipelines for continuous testing and rapid defect detection. Partner with development teams and product managers to define testing priorities and improve QA processes. Contribute to code reviews and share automated testing best practices with the team

Intellias

Odesa, Ukraine

QA Automation Engineer (Nov 2020 — Dec 2023)

As a member of a cross-functional team, I developed API and UI tests for our IoT and Big Data product using Python and the pytest framework. In addition to developing tests, I played a key role in implementing and maintaining our test framework, ensuring its scalability and reliability. In addition to developing tests, I also contributed to developer tasks, leveraging my programming skills to support the development process, and worked extensively with AWS cloud services, leveraging their capabilities to support our testing efforts. To facilitate log analysis and debugging, I utilized Datadog, enabling us to quickly identify and resolve issues.

Luxoft

Odesa, Ukraine

QA Automation Engineer/DB Engineer (Sep 2019 — Nov 2020)

My role was Regular test Engineer in an automotive project. My responsibility was writing performance, Utests, execution of test cycle of performance, and creation of a weekly report of the result. Have experience with Squish Test Framework. In the project, we also use Python and BDD framework.

Digitally Inspired

Odesa, Ukraine

QA Automation Engineer (Dec 2018 — Sep 2019)

Worked on a large-scale e-commerce project, designing and maintaining end-to-end, API, and UI test automation. Developed internal tools for database validation and test data management, and built automation pipelines integrated with CI/CD to ensure stable, fast, and reliable releases.

General QA (Sep 2016 — Aug 2018)

I had been working with a development team. Got experience testing web apps (Angular.js, React.JS) as well as, mobile apps (React-Native). At first performed manual testing, then started writing e2e, UI, and API tests. Also obtained experience in creating test documentation.

EDUCATION

Odessa National Polytechnic University | Odessa, Ukraine *Studied towards Bachelor of Science, Electro-engineering* | 2009 – 2013

Odessa College of Economics and Trade | Odessa, Ukraine *Secondary Technical Education, Management faculty* | 2005 - 2009
